Marko Arsenovic

Chief Operating Officer at JS Guru

We create digital experiences for VC backed startups, innovative tech companies and corporations

IT professional passionate about leading and managing people and projects.

Due to previous background as Project Manager and Quality Assurance Specialist, I have a big affection towards high quality product and project execution.

Apart from working, I like to invest and spend time with my team on activities like Table Football, Table Tennis and barbecues.

Experience:

Chief Operating Officer

JS Guru, Banja Luka, BiH

Full-time
Aug 2020 - Present

Project Manager

JS Guru, Banja Luka, BiH

Full-time
Sep 2019- Present

Project Manager at multiple outsourcing projects.

Developed a custom PM system with primary intention for it to be implemented for start-ups, but is being used on an ongoing projects as well. This PM System covers all aspects and needs of the project, starting from planning phase, to the actual development and execution.

Quality Assurance Specialist

JS Guru, Banja Luka, BiH

Team Lead & QA Specialist

SynapsEES

Mart 2019 - May 2020

QA and team lead of a development team that was working on creating a platform that uses time series data generated by multiple smart devices and offers users the ability to monitor and view data in long time periods. Users can also perform a complex calculation on data series (Interpolation, Regression, Aggregation, Energy efficiency, Energy consumption).

Responsibilities:

- *Testing: Creating and executing test scenarios/cases (regression, sanity, BVT, smoke, exploratory)*
- *Detecting, documenting, reporting, tracking and verifying fixes for software defects (bugs)*
- *Detecting, documenting, reporting, tracking and verifying fixes for software improvements*
- *Regularly communicating with the team and providing reports on test results*
- *Every day use of issues and tasks management tools (e.g. Jira)*
- *Creating acceptance criteria for user stories (based on documented client wishes)*
- *Led a team of seven people*

QA Specialist

MYSPOOT

May 2019 - Sep 2019

Worked on developing a platform that allows freelancers, SME (Small and Medium Enterprises) and corporate employees to identify, book and access the best place for any kind of work activities.

Meet with clients, work with your team, carry out your activities, find great services, locations and community

Responsibilities:

- *Testing: Creating and executing test scenarios/cases (regression, sanity, BVT, smoke, exploratory)*
- *Detecting, documenting, reporting, tracking and verifying fixes for software defects (bugs)*
- *Detecting, documenting, reporting, tracking and verifying fixes for software improvements*
- *Regularly communicating with the team and providing reports on test results*
- *Every day use of issues and tasks management tools (e.g. Tello)*
